

On the 20th of November 2017, on the basis of the Department of Public Health within the framework of the mini-grant “Czech Republic Development Cooperation” to support the scientific activities of students and young scientists, students of the 4th year of the specialty "Treatment" Chernetsky Igor and Koneva Anastasia held a master class for students and teachers. The purpose of the master class was to familiarize those present with the possibilities of using the computer program "MATLAB" in microbiology. Also students presented their own results obtained under this grant in project "Development of mathematical models for prediction of number of psychrotrophic bacteria in chilled milk using computer program" (scientific consultant professor Bergilevich O.).
